Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1- 4, 7, and 8-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Conway, U. S. Patent 6,665,969.
3. Conway teaches a mount for tandem sign comprising a first panel element S1 and a second panel element S2, wherein the first and second panel element can be placed in a readerboard 12. The first panel element has a first semiotic element formed on a first surface of the first panel element and a second semiotic element formed on a first surface of the second panel element, wherein the first and second semiotic elements are complementary such that they combine to form a substantially continuous message when the first and second panel elements are placed adjacent to one another. The first semiotic element comprises at least one of a first portion of a graphic image, sign or media and the second semiotic element

comprises at least one of a second portion of a graphic image, sign, or media. . (Column 3, lines 11-13). The first and second panel elements each have top and bottom edges capable of being engaged by track channels 40 provided as part of readerboard 12 and wherein the panel elements do not include any protrusions for engaging said track channels of the readerboard. (Column 4, lines 11-31).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1, 5, 6, 12-14, 16-21 rejected under 35 U.S.C. 103(a) as being unpatentable over Griffin, U. S. Patent 6,216,375 in view of Conway.

6. Griffin teaches a display panel 1 having horizontal tracks that accept alpha-numeric characters plates 23, wherein the plate 23 maybe transparent, translucent, or opaque. Griffin teaches the plates having an upper edge and a lower edge, wherein the edges are adapted to slide within upper and lower tracks. Figures 38 and 39 show the plates 173 extending over two tracks. It would have been obvious to one having

ordinary skill in the art the time this invention was made to construct the display panel taught by Griffin using the plate elements position adjacent one another as taught by Conway to permit the joining of more than two sign portions so that a rather long sign can be configured taught by Conway. See column 4, lines 18-21.

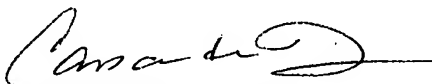

Response to Arguments

7. Applicant's arguments with respect to claims 1 and 12 have been considered but are moot in view of the new ground(s) of rejection.
